

CILA

Canadian Infrastructure Leadership Academy

CILA aspires to build a national community of major project leaders who drive innovation, accountability, and collaboration across Canada's most ambitious infrastructure projects.

CILA

Canadian Infrastructure Leadership Academy

Why now?

Major project leadership is not project management. It is the practice of building teams that are both empowered and accountable. And yet, across the country, too many of Canada's most ambitious projects still struggle. Costs balloon. Deadlines are missed. Expected impacts go unrealized.

At its core, the gap between ambition and outcome is a leadership challenge.

The Canadian Infrastructure Leadership Academy (CILA) aspires **to equip Canada's major project leaders to reach their full potential and transform the governance, productivity, and culture of infrastructure delivery from coast to coast.**

CILA is an executive part-time year long program that includes

Residential Masterclasses

Expert Mentorship

Sector-Specific Virtual Modules

Capstone Project

Who is CILA for?

Senior private or public sector executives with a **minimum of 10 years of direct experience delivering large projects** and a deep commitment to professional excellence and furthering the public interest.

CILA will train leaders who

Have the self-awareness, resilience, and adaptive leadership skills required to navigate complex stakeholder, governance, and commercial environments with authority and integrity.

Harness digital transformation, artificial intelligence, and innovation to unlock productivity and ensure major projects deliver on their promised benefits for communities.

Drive a culture of accountability, collaboration, and open communication, fostering the trust and high performance needed to bring Canada's most ambitious infrastructure projects to successful completion.

Discover. Connect. Join.
